

Quarterly Economic Summary

Mora County

Released: May 2020

Prepared by: Joel Salas, Economist, and Ryan Eustice, Economist

Chart 1. Matched Taxable Gross Receipts Per Quarter

Due to the necessity of the statewide business closure, which went into effect on March 24th, and the health and economic effects COVID-19 had since early March, matched taxable gross receipts and revenue collections may have declined in the third quarter of FY20. Most of the gross receipts tax decline is due to COVID-19 and the loss in business revenue, but potential delays in taxpayer reporting may add to the level of decline seen in the quarter. It is anticipated that the next quarter will have greater declines.

Mora County has seen a steady decline in its matched taxable gross receipts (MTGR) over the last two quarters, as seen in Chart 1. Mora County's MTGR, since Q1 FY20, has declined by 35%. Table 1, on the next page, shows the year over year change for Mora County, comparing Q3 FY19 and Q3 FY20. During that time period, Mora saw a YOY decline of \$1.48M or 17%. This decline was driven by losses in the construction industry (\$1.6M).

Chart 2. FY20 - Q3 Industry Size by Matched Taxable Gross Receipts

Matched Taxable Gross Receipts (MTGR) is the best tax data available to show underlying economic activity. It matches a tax payment with reported receipts for each taxpayer, by industry.

Unclassified Establishments	\$ 38,910	\$ 167,134	\$ 128,224	330%
Utilities	\$ 925,610	\$ 947,462	\$ 21,852	2%
Wholesale Trade	\$ 376,939	\$ 371,146	\$ (5,793)	-2%
All Industries	\$ 8,734,984	\$ 7,248,693	\$ (1,486,291)	-17%

Gross receipts tax (GRT) revenue collections declined significantly in Q3 FY20, as seen in Chart 4. This decrease is due to losses across the board in GRT revenue collections. From Q2 to Q3 of FY20, Mora County had a 22% decrease. Revenue collections saw a 13% year over year decrease, comparing Q3 in FY19 and FY20.

HB6, passed in 2019, made widespread tax changes within New Mexico. One notable change is the conversion to destination-based sourcing that will begin after a two-year delay. During this delay, local governments will receive a distribution that is a portion of \$2M each month. The portion distributed will be based on what the population of each county is to the total population of all counties, as per the most recent decennial census.

Mora County

Chart 5. Quarterly Average Total Employment & Weekly Wage

Chart 6. Quarterly Initial Unemployment Claims

The state makes “hold harmless” payments to local governments equal to the tax revenue that would have been generated if the state had not enacted deductions for food and healthcare practitioner services. These payments will be gradually phased out by 2029, but local governments were able to enact up to three 1/8% GRT increments to offset this loss. These GRT increments were repealed and consolidated in 2019 with a number of other restricted local options under the unrestricted countywide local option with an increased rate cap.

A significant unexplained increase in **Initial Unemployment Claims** can be an early indicator of an incoming economic downturn. Explained increases commonly include seasonal job fluctuations, government shutdowns resulting in mass employee furloughs and the closing of a major regional facility. The major uptick in the initial unemployment claims is directly tied to the COVID-19 outbreak and the subsequent closure of “non-essential” businesses. These businesses tend to be a major component of the workforce. As the stay at home order stays in effect, it is likely that the initial unemployment claims will continue to increase as the economy shifts to handle the unprecedented changes.
